# **MISSCHO International Summer School 2025. Migration in times of disinformation.**

International migration has been a central topic of public, political, and academic debate for years. Misinformation, fake news, and incitements to xenophobia and racism are not new phenomena; however, with the expansion of social media and digital information channels, their reach, dissemination, and forms of transmission have intensified. In this context, we ask ourselves: What role do universities and scientific research centers play in building fairer and more accurate information about international migration? How can our research contribute to a scenario where misinformation is increasingly widespread? How can we bring knowledge closer to society? These are some of the questions that shape the works to be presented at this summer school, approached from various disciplines.

From 7th to 10th July, 2025
