Intended Courses for the Application

Important information (read carefully!)

- Exchange students must successfully complete a minimum of 16 ECTS per semester at University of Graz as their primary host institution (exceptions: research stays, short-term programs, Erasmus+ traineeships). If academically relevant, additional courses can be taken at other universities in Graz via co-enrollment (no extra cost). Those courses will NOT count towards the ECTS requirement of University of Graz. If your home university's ECTS requirement is higher than 16 ECTS, make sure you abide by their requirement!
- Intended Courses must be uploaded during the application process. Course registration takes place in September (for winter semester) and February (for summer semester).
- Information on workload and grading is available *here*.
- Select courses for the semester of your stay & at your current level of enrollment and also include back–up courses.
- Students applying for a stay starting in the fall will work with courses of the academic year preceding their stay. This is due to the fact that courses for any academic year are not confirmed and online before July.
- Students who do not speak German at a level enabling them to follow courses in German are advised to check for *English-taught courses* to see if they can find enough courses relevant to their degree at the home university.

Online Course Guide

Provided your German level is B2 or higher you can make use of the full range of courses

Academic Advisors

If you have any academic questions on the courses, you can contact the academic advisor of the field of study the course is part of.

Make sure you have familiarized yourself with the online course descriptions and read all the information provided online BEFORE contacting the academic advisor.

In your email, properly address the advisor, introduce yourself, and provide course number and course title of the course you are referring to.
